

# Nikita Rudziak

I am responsible and sociable with the desire to develop and learn something new. This year I am graduating from Gomel State University. I began to go deep into the front-end from IBA and EPAM courses. Now I take part in the development of an internal product of EPAM.

I have experience in working with team, to participate in agile activities and demonstrate my work. I have a good feedback from managers and team members.

My goal is to achieve success in IT, improve my soft and professional skills and become better. I chose Front-end because i like to interact with the visual part of applications and implement smth new.

## Skill overview:

- *Programming languages:* JavaScript
- *Framework:* ReactJS (Redux), some experience at NodeJS + Express
- *Layout:* HTML, CSS, Sass
- *Database:* MS SQL Server, MySQL Workbench, NoSQL (Firebase)
- *Version control:* Git Lab, Gerrit, Git Hub
- *Agile methodology:* Scrum, Kanban
- *Project management:* Jira
- *Module bundler:* Webpack
- *Other:* Sequelize

## Experience:

- **Student Software Engineer in EPAM Systems Inc, Gomel**

November 2019 - Present (6 month)

## Project:

- *Examinator:*

The inner project is designed to control knowledge. Trainers create tasks, which may include practical, theoretical tests. The employee or student receives a link to the mail to pass the tests. Then the trainer checks the tasks or the system itself sets the score. We use ReactJS as a front-end part and NodeJS and Express for Back-end.
